

Fondazione Gianfranco Ferré

## Salone del Mobile 2016

During the “Fuorisalone” in the Tortona area the Gianfranco Ferré Foundation hosts some creations of Ivan Paradisi, a forty years old cabinet-maker/artist from Turin, who works inlaid wood from an own different and sophisticated perspective.

Every piece, entirely handmade starting from the concept of shaping and layering, has as a reference the Italian tradition of the "cabinet", with a new space vision.

The precious woods are “bare” treated, the lines are intertwined and intersected with fluidity, the joints are not forced at all.

The production of Ivan Paradisi includes exclusively unique pieces or limited editions.
